11. **MONITORING FRAMEWORK**

12. **INNOVATIVE QUOTIENT**

- 12.1 Virtual Reality (VR) Immersion
- 12.2 Nukkad Natak (Street Plays)
- 12.3 Ludo Based Gamification
- 12.4 Bio-Enzyme Workshops
- 12.5 Textile Upcycling Sessions

13. **CONCLUSION**

1. ABOUT HCL FOUNDATION

HCL Foundation (HCLF), the corporate social responsibility arm of HCLTech, is a value-driven, not-for-profit organization dedicated to national and international development goals. Through its flagship programs, including **My Clean City**, HCLF strives to create transformative solutions in Education, Health, Livelihoods, Environment, and Disaster Risk Reduction, keeping child protection, gender equality, and inclusion at the forefront.

2. ABOUT THE PARTNER ORGANIZATION: WOMENITE

Womenite is a youth-led social initiative focused on community mobilization, gender equality, and sustainable development. As an implementation partner under the **My Clean City** program, Womenite has actively driven capacity-building, behavior-change campaigns, and grassroots engagement in Noida and Greater Noida to promote responsible waste management and inclusive development.

3. EXECUTIVE SUMMARY

Between September 2024 and March 2025, My Clean City's **Transforming Neighbourhoods** initiative – **in collaboration with Womenite** – expanded across Noida and Greater Noida to promote sustainable waste management. Early efforts centered on baseline surveys, team deployment, and forging RWA partnerships—culminating in a multi-pronged engagement strategy that included immersive VR drives, plogging and clean-up campaigns, and specialized workshops on textile, horticulture, biohazard, plastic/e-waste, and greywater themes. Over time, interactive sessions (e.g., seed ball activities, Nukkad Nataks, greywater demonstrations) garnered increasing community support, especially through Volunteer Club actions and large-scale gatherings on occasions like International Volunteer Day and Republic Day. By March 2025, the project had carried out numerous awareness events, bolstered by regular data collection and feedback loops, resulting in strengthened local ownership of responsible waste disposal practices and heightened emphasis on inclusive solutions to environmental stewardship.

4. PROJECT BACKGROUND

The HCL Foundation, through its flagship My Clean City program (launched in 2018), is on a mission to strengthen and improve the processes of Solid Waste Management (SWM) and Liquid Waste Management (LWM) in urban areas. This program, which aims to transform cities into litter- and waste-free regions, focuses especially on Noida and Greater Noida, where HCLF has collaborated with Womenite to drive change with Transforming Neighbourhoods Project under My Clean City program.

With HCLF and Womenite's partnership, the program seeks to address key urban waste challenges by actively engaging Residential Welfare Associations (RWAs) and Volunteers in a comprehensive approach that includes capacity building, awareness creation, behavioral change, and technological interventions.

SWM and LWM have become significant challenges in urban India. Noida, with a population of over 600,000, generates approximately 700 metric tons of waste per day, while Greater Noida, with a population of over 107,000, produces around 300 metric tons of waste daily. Currently, the SWM and LWM systems in Noida and Greater Noida are insufficient, with only 60% of waste being collected and processed in Noida; a similar figure for Greater Noida remains unavailable.

As a result, uncollected waste is often dumped in landfills, drains, or on the streets, leading to environmental pollution and health hazards. Additionally, the current system struggles to manage the rising volume and complexity of waste generated, including hazardous industrial waste, medical waste from hospitals, and electronic waste from households.

Achieving this requires a behavior change campaigns that addresses the core challenges of the city and actively involves residents in effective SWM and LWM waste management practices.

Behavioral change is the cornerstone of achieving sustainable waste management practices. Without shifting public attitudes and habits around waste, even the most technically robust systems are likely to fall short.

Behavior change in waste management fosters sustainable habits that can profoundly impact community health and environment. Daily practices like proper disposal, recycling, and reducing single-use items, when ingrained in residents' routines, lead to cleaner surroundings and diminish the need for costly interventions. Empowering

residents to take ownership of these practices builds self-sustaining ecosystems where community members not only follow best practices but also advocate for them, inspiring others and reinforcing positive habits. This shift from disposal to resourcefulness helps residents see waste as a resource, promoting activities like upcycling and waste-to-art, which encourage innovative thinking. By building a foundation of proactive waste management, communities rely less on external support, growing more resilient over time. Such efforts set a sustainable model for future generations, as children and young adults adopt and continue these practices.

The Transforming Neighbourhoods Project has thus integrated behavior change campaigns to foster this essential awareness and ownership among residents. Through hands-on workshops, community events, and accessible information, the program encourages individuals to be mindful of their waste footprint and make thoughtful, consistent changes in their daily lives. These campaigns aim to build a community that not only understands but also believes in the value of waste reduction and resource management.

By fostering a deeper sense of responsibility and proactive waste management in RWAs, the program builds a foundation for enduring change, aligning residents' habits with the program's larger goal of creating cleaner, healthier urban spaces.

5. PROJECT GOAL

The project aims to strengthen and improve the efficiency of solid waste management practices in residents of identified RWAs/AoAs through

1. Raising awareness about Waste Management, and
2. Capacity Building & Strengthening of Volunteer Groups to transform neighborhood

6. PROJECT STRATEGY

The project is focusing on following focus areas in Noida and Greater Noida to achieve the aforementioned goals.

Focus Areas for Noida

- A. Textile Waste
- B. Biohazards
- C. Horticulture Waste
- D. Plastic Waste & E-Waste
- E. Grey Water

Focus Area for Greater Noida

- A. Source Segregation
- B. Dry Waste
- C. Wet Waste
- D. E-Waste
- E. Plastic Waste

The project adopted a multi-pronged approach that includes the following strategies:

- **Conducting of Events (workshops/trainings)** among the identified clusters for raising awareness about the thematic areas identified for the region.
- **Enhanced Awareness & Knowledge Dissemination:** Increased understanding among residents about the importance of responsible waste treatment.
- **Resource Accessibility:** Improved accessibility to waste management resources and support systems by facilitating cluster RWA connect.
- **Community Initiative:** Active volunteer involvement in developing sense of ownership towards solid waste management within their community.

7. PROJECT ACTIVITY DETAILS

7.1 September 2024

7.1.1. Brief Overview

During September 2024, **My Clean City** and **Womenite** primarily focused on **laying the groundwork** for the Solid and Liquid Waste Management initiative. Two key meetings set overall objectives, clarified governance requirements, and shaped how the project would engage communities in Noida and Greater Noida. The team recruitment process also concluded, ensuring the right expertise was in place before launching on-ground activities.

7.1.2. Detailed Activities

- **Project Framework & Focus Areas**
 - Defined core processes, ensuring both Noida and Greater Noida interventions addressed localized needs.

- For Noida: Textile Waste, Biohazards, Horticulture Waste, Plastic & E-Waste, Grey Water.
- For Greater Noida: Source Segregation (dry/wet), E-Waste, Plastic Waste.
- **Governance & Compliance**
 - Emphasized 100% alignment with policy guidelines and financial procedures.
 - Agreed to notify HCL Foundation of any fund utilization changes beforehand.
- **Team Hiring & Onboarding**
 - A dedicated structure was finalized: one Project Head, one Project Manager, four Mobilizers in Noida, two in Greater Noida, plus M&E, Creative, and Accounting roles.
- **Baseline Survey & M&E Planning**
 - Drafted a concise Baseline Survey to capture current waste habits; feedback from HCLF led to refining question sets to maintain clarity.
 - Outlined a Monitoring & Evaluation approach combining both quantitative and qualitative metrics from RWAs, volunteers, and residents.
- **RWA Partnerships & Volunteer Mobilization**
 - Reviewed existing volunteer data (100 active out of 250 registered in Noida).
 - Decided on continuous RWA dialogues, photo consent protocols, and potential large-scale events (clean-up drives, Women's Day).
 - Integrated the project within the Clean City Program's platform (ICCC) for broader outreach.

7.1.3. Summary Table

Area	Details
Focus Areas (Noida)	Textile, Biohazards, Horticulture, Plastic & E-Waste, Grey Water
Focus Areas (G. Noida)	Source Segregation (Dry/Wet), E-Waste, Plastic Waste
Team Finalization	1 Project Head, 1 Manager, 4 Noida Mobilizers, 2 G. Noida Mobilizers, M&E, Creative, Accountant

Baseline Survey	Drafted questions; trimmed per HCLF feedback; established approach for consistent data collection
Key Next Steps	1) Final survey rollout; 2) RWA formal engagements; 3) Official launch event planning

Overall, **September 2024** served as a **planning-intensive month**, establishing the program’s objectives, focus areas, and initial structures—ensuring a strong foundation for deeper on-ground engagement in the following months.

7.2 October 2024

7.2.1. Brief Overview

In October 2024, **My Clean City** and **Womenite** moved from planning to initial on-ground engagement. Baseline surveys were rolled out in selected Noida sectors, the Monitoring & Evaluation (MNE) document was refined to meet HCL Foundation standards, and crucial outreach activities with RWAs and volunteers gained momentum.

7.2.2. Detailed Activities

- **Baseline Assessment Launch**
 - Finalized survey questionnaire
 - Began collecting data from identified Noida clusters through both in-person and digital modes.

- **Cleanliness Drive at Okhla Bird Sanctuary (2 Oct)**
 - Engaged **50** volunteers in a plogging activity.
 - Womenite provided masks, gloves, jute bags, and tokens of gratitude to officials

- **Volunteers Club Activity at NIEPID, Sector 40 (26 Oct)**
 - Organized a **coloring session** for **150** participants (children with special needs).
 - Aimed to instill early awareness of waste management.

- **Finalized Sectors in Noida & Introductory RWA Meetings**

- Conducted face-to-face sessions with local RWA stakeholders.
- Discussed upcoming waste management interventions (e.g., composting, e-waste).

- **Mobilization in Greater Noida**

- Womenite began efforts to onboard RWAs for future My Clean City activities
- Discussions on replicating the Noida model (volunteer clubs, baseline data gathering).

- **Project Launch Event Planning**

- Collaboratively decided on integrated waste management themes and potential involvement of recyclers.
- Proposed creative elements (like upcycling floral waste) for community participation.

7.2.3. Summary Table

Throughout October 2024, **My Clean City** solidified its **baseline approach** and built **community rapport** via direct interactions, volunteer drives, and strategic planning for upcoming launch events.

7.3 November 2024

7.3.1. Brief Overview

In November 2024, the Transforming Neighbourhoods Project under My Clean City proceeded with significant on-ground momentum in both Noida and Greater Noida. Official launch events took place in Noida (16 November) and Greater Noida West (24 November), attracting residents, RWA representatives, and community stakeholders. These launch events featured immersive Virtual Reality (VR) demonstrations, hands-on seed-ball activities, and discussions on sustainable waste management solutions. Concurrently, baseline survey efforts continued, capturing household-level data to inform localized interventions. Multiple sensitization drives, workshops, and awareness events were also organized, underlining the project's commitment to fostering a culture of responsible waste management across the two regions.

7.3.2. Detailed Activities

- Project Launch Events
 - Noida Launch (16 November 2024)

- Attended by 62 individuals, including RWA members, residents, and local stakeholders.
- Activities included a program overview, seed ball demonstrations,

an immersive VR booth illustrating the impacts of mismanaged waste, and an introduction to “ScrapBuddy” for dry waste solutions.

○ **Greater Noida West Launch (24 November 2024)**

- Engaged residents and RWA office bearers in sessions on personal responsibility for waste management.
- Featured a hands-on seed ball activity and a VR experience to reinforce the importance of waste segregation and recycling.

● **Baseline Surveys**

- **Noida:** 1,348 surveys completed in November 2024, combining in-person outreach and digital methods in consultation with RWA office bearers.

- **Greater Noida:** 638 surveys completed across targeted sectors in November 2024, capturing community needs and existing waste

practices.

- **Sensitization (Awareness) Drives in Noida**

- Eleven awareness drives were conducted throughout November in sectors such as 12V, 45, 62, 71, 82, 100, and 118.
- Activities centered on an immersive VR experience to visualize the local impact of waste mismanagement and highlight best practices in segregation and disposal.
- Participation in each drive ranged from 21 to 61 individuals, including residents, children, and RWA workers. Seed ball exercises and on-the-spot discussions encouraged community involvement.

- **Workshops and Events**

- **In Noida:**

- Workshops on wet waste management, home composting, and bio-enzyme creation were held at Garima Vihar (Sector 35) and Gokuldharm Apartments (Sector 135), each drawing around 50–51 participants.
 - VR booths further demonstrated challenges in waste management and possible solutions.

- **In Greater Noida West:**

- An event at 6th Avenue (Sector 4) on 30 November 2024 introduced 87 attendees to wet waste management, home composting, bio-enzyme techniques, and seed ball activities.
 - A VR experience underscored the urgency of responsible waste handling.

- **Outputs, Outcomes, and Challenges**
 - The project continued to track the number of events and participants through attendance sheets, though consistent pre- and post-event surveying proved difficult due to open venue layouts and varied participant arrival/departure times.
 - As a mitigation strategy, immediate feedback and on-site quizzes or hand-raises were incorporated to gauge knowledge retention and engagement levels.

7.3.3 Summary Table

Key Highlights	Details
Official Launch (Noida)	Held on 16 November with 62 participants who engaged in VR demonstrations, seed ball activities, and explored a dry waste solution with ScrapBuddy.
Official Launch (Greater Noida)	Held on 24 November featuring immersive VR experiences, seed ball activities, and discussions on personal responsibilities for sustainable waste practices.
Baseline Surveys	Completed 1,348 in Noida and 638 in Greater Noida West, covering household waste patterns to guide localized interventions.

Awareness Drives (Noida)	Organized 11 drives across multiple sectors, each reaching 21 to 61 participants, featuring VR immersion and interactive discussions on waste management.
Workshops & Events	Conducted in Noida at Garima Vihar (Sector 35) and Gokuldharm Apartments (Sector 135), and in Greater Noida at 6th Avenue (Sector 4). Focus areas included composting, bio-enzymes, and other practical solutions.
Challenges	Difficulty administering pre- and post-session surveys in open venues. In-session Q&A and attendance tracking were used as mitigation measures.

Overall, November 2024 solidified the project’s local presence through formal launches, expanded baseline data collection, and interactive drives and workshops. This month’s engagements laid critical groundwork for deeper community ownership and reinforced the program’s emphasis on practical, hands-on methods to foster sustainable waste management practices across Noida and Greater Noida.

7.4 December 2024

7.4.1. Brief Overview

During December 2024, the Transforming Neighbourhoods Project under My Clean City engaged communities in Noida and Greater Noida through a series of thematic drives, workshops, and surveys. The month began with International Volunteers Day celebrations, followed by focused sessions on wet and horticulture waste, textile waste, and greywater management. Multiple sensitization drives reached over a thousand residents, highlighting the importance of consistent, inclusive waste disposal practices and resource stewardship. Preparations for installing waste management machines advanced through market surveys and final site visits, aiming to strengthen local ownership in sustainable waste management.

- 7.4.2. Detailed Activities
- International Volunteers Day (1 December)
 - Brought together 136 volunteers from both Noida and Greater Noida.

- Activities included storytelling, quizzes on environmental topics, and recognition for exceptional volunteer contributions.

- **Wet Waste Management and Seed Ball Sessions (1, 8, and 14 December)**

- Practical workshops covered composting, bio-enzyme preparation, and horticulture waste handling.
- Seed ball demonstrations engaged over 150 participants on 1 December and 8 December; an additional 63 participants joined on 14 December.

- **Textile Waste Awareness Workshops (7 and 8 December)**

- Conducted at various locations in Noida, each session emphasizing practical ways to reuse and recycle household textiles.

- On 7 December, 72 and 56 participants took part in two separate workshops; 75 participants joined the session on 8 December.

- **Greywater Management Workshop (15 December)**
 - Focused on practical methods to segregate and reuse greywater in households, including a participatory discussion on water flow mapping.
 - Recorded 88 attendees who provided both pre- and post-session survey responses, indicating an increase in knowledge and intent to adopt greywater practices.

- **Sensitization Drives**
 - Held throughout December, involving over 1,000 participants across Noida and Greater Noida.

- Incorporated immersive Virtual Reality experiences and gamification (e.g., Ludo-based sessions), highlighting waste segregation, recycling, and responsible disposal.

- **Market Surveys for Waste Management Machines (10, 11, and 18 December)**
 - Identified strategic spots in Noida, such as busy shops and chemists, to encourage broader resident participation.
 - A site visit on 19 December with the HCL Foundation team finalized proposed locations, paving the way for machine installations.

7.4.3. Summary Table

Key Highlights	Details
International Volunteers Day	136 volunteers participated in interactive sessions and received recognition for their contributions.
Wet Waste & Seed Ball Workshops	Sessions on 1, 8, and 14 December engaging 50, 101, and 63 participants, respectively.
Textile Waste Workshops	Organized on 7 and 8 December; 72, 56, and 75 participants attended different sessions.
Greywater Management Workshop	Held on 15 December with 88 attendees, highlighting practical reuse and water-saving strategies.
Sensitization Drives	Over 1,000 participants reached through immersive VR demonstrations and interactive games.

Market Surveys & Site Visit for Waste Management Machines	Surveys on 10, 11, 18 December; final location review on 19 December with HCL Foundation.
Performance Indicators	1,111 stakeholders sensitized (up from 839 in November); 17 events conducted (up from 16 in November).

Overall, December 2024 saw enhanced volunteer engagement, expanded community-driven workshops, sensitization drives and solidified plans for practical waste management infrastructure.

7.5 January 2025

7.5.1. Brief Overview

In January 2025, the Transforming Neighbourhoods Project under My Clean City continued to engage communities in Noida and Greater Noida through targeted workshops, awareness campaigns, and interactive drives. Greywater management

took center stage early in the month, followed by extensive sensitization sessions on e-waste, single-use plastic, and menstrual waste. The project also marked Republic Day with a large-scale pledge drive, attracting significant community participation. A plogging event toward the end of January reinforced civic responsibility and waste segregation practices, highlighting the sustained momentum toward cleaner neighborhoods.

7.5.2. Detailed Activities

- **Grey Water Management Workshop (4 January 2025)**
 - Location: Madhuban Apartment, Sector 82, Noida
 - Participants: 58

- Focus: Educating residents on greywater reuse, water mapping, and sustainable conservation practices.
- Outcome: Participants gained practical insights into repurposing household water for gardening, cleaning, and other non-potable uses.

- **Sensitization Drives on E-Waste & Single-Use Plastic**
 - Conducted throughout January in multiple Noida sectors.
 - Over 700 residents were engaged, learning about safe e-waste disposal, single-use plastic reduction, and the harmful impact of poor waste management on health and the environment.
 - Formats included placard campaigns, interactive discussions, and

demonstrations, leading to pledges for adopting sustainable habits.

- **Menstrual Waste Awareness Campaign (25 January 2025)**
 - Locations: Sector 45 and Sector 50, Noida
 - Participants: 82
 - Focus: Addressing the high plastic content in sanitary napkins and promoting eco-friendly alternatives such as reusable cloth pads and menstrual cups.
 - Outcome: Many attendees indicated readiness to switch to more sustainable products, illustrating a growing behavioral shift toward reduced plastic waste.
- **Plogging Drive & Clean-Up Campaign (30 January 2025)**
 - Location: Sector 112, Noida
 - Participants: 54
 - Overview: A community-led effort encouraging residents to pick up plastic litter while jogging, reinforcing shared responsibility for neighborhood cleanliness.

- Outcome: Raised awareness about proper waste segregation and recycling, motivating residents to organize regular clean-up activities.

- **Republic Day & Environmental Awareness (26 January 2025)**
 - Location: Rajat Vihar, Sector 62, Noida
 - Participants: Approximately 300, including RWA members and Noida Authority representatives.
 - Focus: Highlighting the impact of single-use plastics and celebrating volunteers' environmental contributions.
 - Outcome: Large turnout facilitated pledges to reduce plastic usage, further anchoring sustainable waste management within local celebrations.

7.5.3. Summary Table

Key Highlights	Details
Grey Water Management Workshop	Held on 4 January at Madhuban Apartment (Sector 82), with 58 participants learning methods for water reuse and conservation.
Sensitization Drives (E-Waste & Plastics)	Conducted throughout January, engaging over 700 individuals in Noida. Covered safe e-waste disposal, reducing single-use plastic, and healthy waste management habits.
Menstrual Waste Awareness Campaign	Conducted on 25 January in Sector 45 and Sector 50, educating 82 attendees on the plastic content in sanitary products and promoting reusable cloth pads and menstrual cups.
Plogging Drive & Clean-Up	Organized on 30 January in Sector 112, involving 54 participants who collected

	waste while walking or jogging, reinforcing community accountability.
Republic Day Environmental Awareness	26 January event in Rajat Vihar (Sector 62) with around 300 attendees. Emphasized reducing single-use plastic and recognized outstanding volunteer contributions.
Performance Indicators	1,133 stakeholders sensitized (up from 1,111 in December); 17 events conducted (the same as in December).

7.6 February 2025

7.6.1. Brief Overview

In February 2025, the Transforming Neighbourhoods Project under My Clean City expanded its outreach in Noida and Greater Noida with a series of dynamic awareness sessions, street plays (Nukkad Nataks), and targeted discussions on waste management. These efforts focused on single-use plastic, e-waste, menstrual waste, and source segregation. The use of street plays across multiple locations was a standout approach, effectively engaging communities and driving home the urgency of responsible waste practices. Many sessions highlighted the importance of reducing plastic-based sanitary products, recycling hazardous e-waste properly, and implementing household-level segregation.

7.6.2. Detailed Activities

1. Awareness Sessions on Waste Management

- Multiple sessions across sectors in Noida and Greater Noida, addressing single-use plastic, e-waste, greywater management, and menstrual waste.

- Street plays and placard campaigns underscored the harmful impacts of plastic pollution and hazardous materials in e-waste, while emphasizing alternatives and responsible disposal.

2. Menstrual Waste Awareness Campaigns

- Held in residential areas such as Express View Apartment, Madhuban Apartment, The Villas, Sector 45, and Sector 118.
- Sessions highlighted plastic-based sanitary products' negative environmental effects and promoted sustainable menstrual hygiene solutions (e.g., menstrual cups, biodegradable pads).

3. Community Engagement through Street Plays

- Nukkad Natak performances were integrated into almost every session, transforming complex environmental issues into relatable narratives.
- Helped spark discussions on taboo topics like menstrual waste, while illustrating best practices in waste segregation and plastic reduction.

4. Source Segregation & E-Waste Awareness Drives

- Focused on distinguishing wet, dry, and hazardous waste, recommending the use of separate bins (green, blue, red).
- Stressed proper e-waste disposal to prevent toxic leakage and environmental damage, especially in sessions at Stellar Jeeva (Sector 1, Greater Noida) and Eldeco Green Meadows (Sector Pi, Noida).

7.6.3. Summary Table

Key Highlights	Details
Awareness Sessions on Waste Management	Conducted throughout February, covering single-use plastic, e-waste, greywater, and menstrual waste. Employed placards and interactive activities to emphasize responsible disposal and minimize environmental harm.
Menstrual Waste Awareness Campaigns	Organized in Express View Apartment, Madhuban Apartment, The Villas, Sector 45, and Sector 118. Focused on plastic-free sanitary products, safe disposal, and promoting sustainable menstrual hygiene solutions.
Street Plays (Nukkad Natak)	Used extensively in each session to engage participants, dramatize the consequences of poor waste management, and underscore the importance of eco-friendly behavioral shifts.
Source Segregation & E-Waste Drives	Highlighted at Stellar Jeeva (125 participants) and Eldeco Green Meadows (52 participants), guiding households on wet vs. dry waste segregation and e-waste handling.
Performance Indicators	852 stakeholders sensitized; 14 total events conducted.

Overall, February 2025 witnessed deepened community engagement through creative methods like street plays and ongoing dialogue about plastic, e-waste, and menstrual waste management. These efforts reinforced the foundational practices of segregation, reuse, and responsible disposal, fostering a growing culture of sustainability across Noida and Greater Noida.

7.7 March 2025

7.7.1. Brief Overview

In March 2025, the Transforming Neighbourhoods Project under My Clean City conducted a series of awareness sessions and street plays (Nukkad Nataks) across Noida and Greater Noida, emphasizing menstrual waste management, plastic-free alternatives, and safe disposal practices. Many of these events also coincided with International Women's Day celebrations, honoring the contributions of women to sustainable community development.

7.7.2. Detailed Activities

1. Menstrual Waste and Plastic-Free Hygiene

- Sessions consistently highlighted the harmful effects of plastic-based sanitary products.
- Promoted eco-friendly alternatives like reusable cloth pads and menstrual cups, which can be used for up to ten years.
- Encouraged attendees to switch to biodegradable options and follow safe disposal methods to reduce plastic pollution.

2. Street Plays (Nukkad Nataks)

- Performed at multiple venues (e.g., Sector 50, Adarsh Vihar, Omicron 1), dramatizing the importance of segregating dry and wet waste, handling e-waste responsibly, and adopting jute bags over single-use plastics.
- Simplified complex issues for broader community understanding, leading to greater engagement and willingness to adopt eco-friendly

habits.

3. International Women's Day Focus

The HCL Foundation organized a vibrant celebration of International Women's Day in Noida and Greater Noida, with around 1,000 participants in Noida and 900 in Greater Noida.

In Noida, the event was centralized, bringing together participants from various Resident Welfare Associations (RWAs) to celebrate the achievements and contributions of women in society. The celebration included a cultural program, a panel discussion, and the honoring of leading women who have made significant contributions to the cause of cleanliness (Swachhta). Natural leaders who have positively impacted their communities were also felicitated, further emphasizing the importance of social responsibility.

In Greater Noida, the celebration took place at 13 different locations, with a focus on both women's empowerment and cleanliness. The event featured Nukkad Nataks (street plays) celebrating the spirit of women and a clean city. In addition, fun-filled activities were organized, along with awareness sessions on menstrual waste, aiming to educate and sensitize the community on this important issue.

By combining the celebration of women's strength with the spirit of cleanliness, the HCL Foundation's initiative successfully fostered a sense of unity, social

responsibility, and community engagement, raising awareness on critical topics such as menstrual health and environmental sustainability

○ .

4. Responsible Disposal and Source Segregation

- Sessions in areas like Delta 1, Sigma 1, Omicron 3, and Swarnim Nagri Affordable House further emphasized proper disposal of garbage, including hazardous e-waste.
- Participants were encouraged to adopt a three-bin system (wet, dry, and hazardous) to streamline recycling and minimize environmental harm.

○

7.7.3. Summary Table

Key Highlights	Details
Menstrual Waste Awareness	Covered dangers of plastic-based pads and introduced sustainable alternatives (menstrual cups, biodegradable sanitary products).
Street Plays (Nukkad Nataks)	Demonstrated best practices in waste segregation, e-waste recycling, and eco-friendly behavior through interactive performances, capturing wide community attention.
International Women’s Day Celebrations	Events across Noida and Greater Noida honored women’s contributions, merging awareness on waste management with empowerment themes.
Focus on Source Segregation & Disposal	Reinforced the use of separate bins for wet, dry, and hazardous waste, along with the safe handling of e-waste, to prevent toxic leakage and environmental damage.

Community Engagement	Spanned locations such as Sector 50, Hyde Park, Adarsh Vihar, Beta 1, Gaur Saundaryam, Stellar One, Delta 1, Sigma 1, Omicron 1, Sector 37, Sigma 3, Sector 2B, Omicron 3, and Swarnim Nagri Affordable House.
Events & Participants	Fifteen awareness sessions were organized from 1 March to 9 March, cumulatively engaging hundreds of residents in responsible waste management dialogues and demonstrations.

Throughout March 2025, the campaign combined educational talks, dramatic street plays, and special Women’s Day recognitions, effectively uniting diverse communities around practical, inclusive solutions for sustainable waste management.

8. BASELINE SURVEYS

8.1. Purpose and Process

A comprehensive baseline survey was conducted to evaluate the initial awareness, attitudes, and practices related to solid and liquid waste management among residents in Noida and Greater Noida. Two Google Forms were designed specifically for each region, reflecting their distinct focus areas. Data collection involved both in-person visits—carried out by a third-party agency in targeted residential areas—and online participation via WhatsApp groups. These methods allowed for a robust sample drawn from a mix of structured RWAs in Noida and more dispersed communities in Greater Noida.

- **Noida Focus Areas**
 - Textile Waste
 - Biohazard Waste
 - Horticulture Waste
 - Plastic Waste & E-Waste
 - Grey Water
- **Greater Noida Focus Areas**
 - Source Segregation
 - Dry Waste

- Wet Waste
- E-Waste
- Plastic Waste

Survey Coverage

- **Noida:** 2,010 responses, predominantly from RWAs.
- **Greater Noida:** 1,013 responses, often requiring individualized household visits due to fewer structured societies.

Key Survey Domains

Each focus area had two targeted questions to assess existing knowledge and willingness to adopt better waste management practices, yielding both quantitative results (confidence, awareness, willingness levels) and qualitative insights (barriers, motivators).

8.2. Challenges Encountered

- **Delayed Start:** The program experienced a 45-day delay, compressing the timeline and pushing baseline efforts into a festival season.
- **RWA Permissions:** Conducting the survey in closed communities required obtaining permissions from Resident Welfare Associations, sometimes leading to initial hesitations and incremental approvals.
- **Greater Noida Constraints:** The absence of fully structured societies meant a more scattered approach, finalized only after November 5, 2023. Surveyors had to adapt to open-ended community engagement.
- **Mobilization Issues:** Festivals like Diwali and Chhath complicated on-ground activities, extending the survey window. Effective rapport-building was required to encourage sustained participation.

Despite these hurdles, persistent coordination with RWAs, use of festival gatherings for outreach, and incremental progress in gaining permissions led to successful completion of the baseline exercise.

8.3. Findings: Noida Cluster Overview

- **Total Responses:** 2,010

- **Domains:** Textile Waste, Biohazard Waste, Horticulture Waste, Plastic/E-Waste, Grey Water

Key Observations

- Many respondents expressed moderate to high confidence in adopting practices like composting or e-waste recycling, yet indicated gaps in practical knowledge.
- A significant portion showed interest in reusing or recycling textiles, but practical accessibility to collection points was limited.
- Biohazard disposal knowledge was uneven; safety concerns existed but with fewer concrete steps in place.
- Grey water reuse garnered curiosity, although cost and technical considerations discouraged wider adoption.

Domain-Wise Highlights

- **Textile Waste:** Roughly 45% were “Confident” in reusing clothes. About 60% were “Willing” to learn recycling methods. Practical demos and organized donation drives can help.
- **Biohazard Waste:** 40% identified themselves as “Knowledgeable,” but only 15% reported feeling “Very Knowledgeable.” Simple tutorials and specialized bins are recommended.
- **Horticulture Waste:** Interest in composting existed (50% “Willing”), but actual know-how remains limited. Providing compost kits and demonstrations is crucial.
- **Plastic and E-Waste:** Despite moderate awareness (50% stated “Understand segregation”), many hesitated to use authorized e-waste recyclers. Partnerships with trusted recyclers are needed.

- **Grey Water:** 50% felt “Confident” exploring basic recycling options. However, 40% remained uncertain about

cost, pointing to a need for user-friendly demonstrations.

Recommendations

- **Targeted Campaigns:** Offer upcycling workshops for textiles, demonstrate correct e-waste disposal, and organize horticulture composting classes.
- **Infrastructure Enhancements:** Collaborate with civic authorities to install labeled bins and create dedicated e-waste drop-off points.
- **Incentives & Recognition:** Provide composting bins or small discounts on utility fees for participants adopting certain practices.
- **Behavioral Campaigns:** Reinforce knowledge with follow-up visits, focusing on bridging the gap between awareness and consistent action.

8.4. Findings: Greater Noida Cluster
Overview

- **Total Responses:** 1,013
- **Domains:** Source Segregation, Dry/Wet Waste, E-Waste, Plastic Waste

Key Observations

- Source segregation was familiar to many, yet 25% admitted to inconsistent separation.
- E-waste disposal knowledge varied, with many unaware of certified collection points.
- Willingness to move away from single-use plastics was relatively high, but habitual reliance persisted in certain segments.
- Composting for wet waste saw interest, though 30% had no immediate plans to start.

Domain-Wise Highlights

- **Source Segregation:** 40% “Always” separated wet/dry, while 25% rarely did. Clear instructions and color-coded bins can improve consistency.
- **Dry Waste:** Over 50% were “Very Willing” to participate in community-led collection programs, showing strong potential for organized drives.
- **Wet Waste:** 70% had some level of interest in composting, though only 40% intended to begin within six months. Odor, complexity, and cost misperceptions need addressing.
- **E-Waste:** 68% were “Willing” or “Very Willing” to use authorized channels, but 20% lacked awareness of proper disposal points. Education and convenient infrastructure are paramount.
- **Plastic Waste:** 60% were “Very Familiar” with plastic’s harmful effects, and about half already used reusable alternatives. However, 20% remained heavily reliant on single-use plastics.

Recommendations

- **Practical Training:** Offer composting demonstrations, source segregation workshops, and e-waste drives to familiarize residents with step-by-step processes.
- **Community-Led Drives:** Encourage group activities like neighborhood drop-off days for e-waste or scheduled plastic recycling pickups.
- **Leadership Roles:** Empower local champions to guide and track household-level improvements in segregation, ensuring consistent follow-through.
- **Reward Mechanisms:** Incentivize early adopters through public recognition or small benefits to catalyze participation from neutral or hesitant residents.

8.5. Overall Insights and Conclusion

The baseline survey underscores significant potential across both Noida and Greater Noida for advancing solid and liquid waste management practices. High levels of general awareness contrast with gaps in practical knowledge, infrastructure, and consistent participation. Residents often express motivation when guided by accessible demonstrations, supportive leadership, and tangible incentives.

- **Key Opportunities**
 - Providing easy-to-use composting kits for horticulture and wet waste.
 - Setting up authorized e-waste drop points and forging local partnerships with recyclers.
 - Integrating practical, community-led workshops to demystify grey water reuse, biohazard disposal, and textile upcycling.
 - Fostering volunteer leadership within RWAs to champion continuous improvement and peer learning.
- **Path Forward**
 - **Actionable Training:** Focus on bridging the awareness-action gap with interactive sessions and user-friendly resources.
 - **Infrastructure Alignment:** Coordinate with municipal bodies to ensure the availability of bins, e-waste facilities, and composting sites.
 - **Sustainable Behavior:** Reinforce positive habits through repeated engagement, recognition of model residents, and incremental goal-setting.

- **Data-Driven Approach:** Use periodic follow-up surveys to monitor adoption rates, refine strategies, and sustain momentum.

This baseline assessment provides a clear roadmap for targeted interventions, indicating that with the right support, many residents are ready to adopt improved waste management practices. By systematically addressing knowledge gaps, infrastructural barriers, and motivational factors, the My Clean City program can catalyze lasting environmental stewardship in both Noida and Greater Noida.

9. CONSOLIDATED RECORD OF EVENTS (OCTOBER 2024 – MARCH 2025)

Below is a set of tables covering all documented events from October 2024 through March 2025. Each entry reflects the exact dates, participant counts, locations, and descriptions as stated in the monthly reports.

9.1 October 2024

DATE	EVENT TITLE / TYPE	LOCATION	DESCRIPTION	PARTICIPANTS
02-Oct-24	Cleanliness Drive (part of My Clean City Volunteers)	Okhla Bird Sanctuary	• Volunteers conducted a plogging/cleanliness activity • Masks, gloves, jute bags provided • Drive aimed at reducing litter in the sanctuary	50
26-Oct-24	Coloring Activity for Special Children (My Clean City Volunteer Club)	NIEPID Model Special Education Centre, Sector 40, Noida	• Volunteers engaged with children in a creative drawing • Promoted inclusivity and basic environmental awareness	150

9.2 November 2024

DATE	EVENT TITLE / TYPE	LOCATION	DESCRIPTION	PARTICIPANTS
------	--------------------	----------	-------------	--------------

16-Nov-24	Project Launch Event (Noida)	Noida	• Official launch of Transforming Neighbourhoods Project • Introduced goals, seed ball activity, VR demonstrations • Residents, RWAs, Womenite, resource persons participated	62
21-Nov-24	Sensitization Drive	Sector 118 RWA, Noida	• Highlighted impacts of waste mismanagement • Encouraged proper disposal methods	61
22-Nov-24	Sensitization Drive	Sector 48, Noida	• Educated residents on e-waste and single-use plastics • Emphasis on reducing plastic usage	21
22-Nov-24	Workshop on Waste Management, Home Composting, and Bio-enzyme Preparation	Garima Vihar, Sector 35, Noida	• Focused on composting and bio-enzyme techniques • Interactive demos and a VR booth	50
23-Nov-24	Sensitization Drive	Madhuban Apartments, Sector 82, Noida	• Discussion on effective waste segregation • Residents and RWA members engaged	59
23-Nov-24	Sensitization Drive	Swarnim Vihar, Sector 82, Noida	• Addressed waste segregation, local environment issues • Hands-on activities for participants	60
24-Nov-24	Project Launch Event (Greater Noida West)	Greater Noida West	• Introduced the project to local stakeholders • Seed ball activity, VR awareness booth	87

24-Nov-24	Workshop on Waste Management, Home Composting, and Bio-enzyme Preparation	Gokuldham Apartments, Sector 135, Noida	• Covered composting practices and reusability • Residents tried hands-on bio-enzyme prep	51
26-Nov-24	Sensitization Drive	Sector 12V, Noida	• Discussed reducing plastic waste • Encouraged RWA involvement in recycling	47
27-Nov-24	Sensitization Drive	Jagriti Apartment, Sector 71, Noida	• Focus on plastic and e-waste hazards • VR tools to show impact of improper disposal	54
27-Nov-24	Sensitization Drive	Rajat Vihar, Sector 62, Noida	• Emphasized wet and dry waste segregation • Residents took pledges for responsible disposal	55
28-Nov-24	Sensitization Drive	Sri Sai Apartments, Sector 71, Noida	• Addressed single-use plastics • Demonstrated alternative materials	45
28-Nov-24	Sensitization Drive	Flex Apartments, Sector 62, Noida	• Discussed e-waste recycling solutions • Encouraged safe disposal methods	42
29-Nov-24	Sensitization Drive	The Villas, Sector 100, Noida	• Highlighted plastic pollution • Placard demonstrations and interactive discussions	53
29-Nov-24	Sensitization Drive	Sector 45, Noida	• Reinforced best practices for source segregation • Residents shared local waste challenges	59

30-Nov-24	Workshop on Waste Management, Home Composting, and Bio-enzyme Preparation	6th Avenue, Sector 4, Greater Noida West	• Demonstrations on composting, seed ball activity • VR booth to visualize waste scenarios	87
-----------	---	--	---	----

9.3 December 2024

DATE	EVENT TITLE / TYPE	LOCATION	DESCRIPTION	PARTICIPANTS
01-Dec-24	International Volunteers Day	Fortune Inn, Noida	• Volunteers, RWAs, children took part • Storytelling on waste management, quiz, recognition of volunteers	136
01-Dec-24	Workshop on Horticulture Waste Management, Composting, and Seed Ball Activity	Century Apartments, Noida	• Introduced DIY composting methods • VR experiences highlighting waste generation impact	50
03-Dec-24	Sensitization Drive	Sector 112, Noida	• VR activity to show environmental harm of plastics/e-waste • Encouraged daily waste segregation at home	52
04-Dec-24	Sensitization Drive	Sector 12, Noida	• Placard campaign focusing on source segregation • Emphasis on reducing landfill burden	50
05-Dec-24	Sensitization Drive	Sai Apartments, Sector 71, Noida	• VR experiences to educate about e-waste hazards	50

			• Called for adopting reusable products	
07-Dec-24	Sensitization Drive + Textile Waste Awareness (some references call it a workshop)	Garima Vihar, Sector 35, Noida	• Highlighted reusing/recycling household textiles • Street-style demonstration on waste sorting	72
07-Dec-24	Textile Waste Awareness Workshop	Sector 12, Noida	• Stressed the environmental impact of fast fashion • Provided ideas for repurposing old clothes	56
08-Dec-24	Workshop on Waste Awareness, Source Segregation, Horticulture Waste Management, Seed Ball Activity	Panchsheel Green 1, Sector 16B, Noida	• Showed composting steps, VR experiences on waste harm • Participants made seed balls for future planting	101
08-Dec-24	Textile Waste Awareness Workshop	Shri Ram Apartments, Sector 118, Noida	• Encouraged donation, upcycling, cloth reuse • Demonstrations on minimal waste wardrobe	75
09-Dec-24	Sensitization Drive	Sector 45, Noida	• Ludo-style game to learn about recycling • Discussion on local trash disposal systems	50
10-Dec-24	Sensitization Drive	Swarnim Vihar, Sector 82, Noida	• VR booth for plastic & e-waste problems • Shared methods for responsible discarding	56
11-Dec-24	Sensitization Drive	Jagriti Apartments, Sector 71, Noida	• Covered harmful effects of plastic litter • Encouraged community composting approach	58

12-Dec-24	Sensitization Drive	Tech Zone 4, Centurion Park, Greater Noida	• Interactive Ludo game explaining waste categories • Pushed for better e-waste disposal routines	58
13-Dec-24	Sensitization Drive	Sector 48, Noida	• Focus on single-use plastics • Placard demonstration on recycling tips	54
14-Dec-24	Workshop on Waste Management & Horticulture Seed Ball Activity	Super Tech Eco Village III, Greater Noida	• Hands-on composting & horticulture waste usage • VR tool to visualize city's waste levels	63
15-Dec-24	Sensitization Drive	Jagriti Apartments, Sector 71, Noida	• Included a greywater management activity • Emphasized reusing water for non-drinking purposes	88
22-Dec-24	Sensitization Drive	Express View Apartments, Sector 105, Noida	• VR demonstration of waste hazards • Urged correct disposal of household e-waste	42

9.4 January 2025

DATE	EVENT TITLE / TYPE	LOCATION	DESCRIPTION	PARTICIPANTS
04-Jan-25	Workshop on Grey Water Management	Madhuban Apartment, Sector 82, Noida	• Mapped household water usage • Demonstrated simple reuse/filtration methods	58
10-Jan-25	Sensitization Drive on E-Waste	Sector 49, Noida	• Informative discussions on e-waste hazards • Showed how to recycle electronics responsibly	53

11-Jan-25	Sensitization Drive on E-Waste (combined session incl. Jagriti Apartment)	Sector 71 (Sai Apartment & Jagriti Apartment), Noida	• Single-use plastic issues also addressed • Pledge to reduce plastic usage	54
11-Jan-25	Sensitization Drive on Single-Use Plastics and E-Waste	Sector 117, Noida	• Emphasis on alternative materials • Visuals explaining toxic components in e-waste	51
12-Jan-25	Sensitization Drive on Single-Use Plastics and E-Waste	Sector 47 (Jalvayu Tower), Noida	• Encouraged reusable options • Called for safe disposal channels	51
14-Jan-25	Sensitization Drive on Single-Use Plastics and E-Waste	The Villas, Sector 100, Noida	• Discussion on segregating dry/wet waste • Showed real cases of plastic pollution	56
14-Jan-25	Sensitization Drive on Single-Use Plastics and E-Waste	Sector 48, Noida	• Placard demonstration & short video • Motivated participants to adopt eco-friendly routines	54
19-Jan-25	Awareness Event on Plastic and E-Waste Management	Hyde Park, Sector 78, Noida	• Street-style messages highlighting plastic hazards • Urged safe recycling of electronics	54
23-Jan-25	Sensitization Drive on Single-Use Plastics and E-Waste	Garima Vihar, Sector 35, Noida	• Community discussion about rising plastic trash • Shared local drop-off points for e-waste	63
23-Jan-25	Sensitization Drive on Single-Use Plastics and E-Waste	Sector 12, Noida	• Placard campaigns for e-waste disposal • Gathered suggestions from residents	54

24-Jan-25	Sensitization Drive on E-Waste and Single-Use Plastics	Madhuban Apartment, Sector 82, Noida	• Illustrated methods of reducing daily plastic • Focus on safe disposal of electronics	51
24-Jan-25	Sensitization Drive on E-Waste and Single-Use Plastics	Swarnim Vihar, Sector 82, Noida	• Highlighted health hazards from plastics • Encouraged using biodegradable alternatives	45
25-Jan-25	Sensitization Drive on Menstrual Waste, E-Waste, and Single-Use Plastics	Sector 45, Noida	• Showed how plastic in sanitary products harms environment • Demonstrated reusable menstrual hygiene items	48
25-Jan-25	Sensitization Drive on Menstrual Waste, E-Waste, and Single-Use Plastics	Sector 50, Noida	• Addressed taboo around menstrual waste • Provided info on safe disposal and alternatives	34
26-Jan-25	Republic Day Celebration and Awareness Campaign on Single-Use Plastic	Rajat Vihar, Sector 62, Noida	• Large-scale drive encouraging plastic reduction • Citizens took a pledge for cleaner surroundings	300
28-Jan-25	Sensitization Drive on E-Waste, Single-Use Plastic Waste, and Menstrual Waste	Sector 118, Noida	• Combined demonstration on proper e-waste channels • Promoted eco-friendly sanitary options	53
30-Jan-25	Plogging Drive	Sector 112, Noida	• Community collected plastic litter while jogging • Reinforced routine plogging to keep area clean	54

9.5 February 2025

DATE	EVENT TITLE / TYPE	LOCATION	DESCRIPTION	PARTICIPANTS
09-Feb-25	Awareness Session on Waste Management – E-Waste & Single-Use Plastic Waste	Sector 135, Gokuldham Society, Noida	• Emphasized hazards of e-waste and single-use plastics • Placards illustrating recycling steps	50
15-Feb-25	Awareness Session on Waste Management – Plastic Waste & E-Waste	Sector 12, Noida	• Featured a Nukkad Natak for easy engagement • Urged disposal in designated bins	56
15-Feb-25	Awareness Session on Waste Management – Plastic Waste & E-Waste	Sector 48, Noida	• Stressed health and environmental impacts • Encouraged plastic reduction at source	56
16-Feb-25	Awareness Session on Waste Management – Plastic Waste & E-Waste	Sector 71 (Sai Apartment), Noida	• Street play highlighting hazards • Showed local recycling avenues	54
16-Feb-25	Awareness Session on Waste Management – Plastic Waste & E-Waste	Sector 72, Noida	• VR demonstration of plastic pollution • Called for e-waste drop-off centers	54
16-Feb-25	Awareness Session on Waste Management – Plastic Waste & E-Waste	Sector 62 (Flex Apartment), Noida	• Provided steps for correct e-waste recycling • Visual aids for plastic harm	53
22-Feb-25	Awareness Session on Menstrual	Express View Apartment, Sector 105, Noida	• Street play on menstrual waste & plastic pads • Promoted	45

	Waste Management		biodegradable sanitary products	
22-Feb-25	Awareness Session on Menstrual Waste Management	Madhuban Apartment, Sector 82, Noida	• Highlighted grey water & textile waste link • Encouraged cloth/reusable pads	43
22-Feb-25	Awareness Session on Menstrual Waste Management	The Villas, Sector 100, Noida	• Showed plastic's role in sanitary waste pollution • Encouraged compostable or reusable solutions	50
23-Feb-25	Awareness Session on Menstrual Waste Management	Sector 45, Noida	• Nukkad Natak on hazards of disposable pads • Pushed for safe disposal, cloth pads	63
23-Feb-25	Awareness Session on Menstrual Waste Management	Shri Ram Apartment, Sector 118, Noida	• Explained biodegradable sanitary options • Large turnout with active Q&A	95
23-Feb-25	Awareness Session on Waste Management – Source Segregation & E-Waste	Stellar Jeeva, Sector 1, Greater Noida	• Emphasized colored bins for wet, dry, hazardous • Detailed e-waste hazards, recycling routes	125
27-Feb-25	Awareness Session on Waste Management – Source Segregation	Eldeco Green Meadows, Sector Pi, Noida	• Demonstration of separating wet/dry/hazardous • Encouraged home composting	52
27-Feb-25	Awareness Session on Menstrual Waste Management	Jagriti Apartment, Sector 71, Noida	• Focused on plastic in sanitary pads • Promoted menstrual cups, cloth pads	56

9.5 March 2025

DATE	EVENT TITLE / TYPE	LOCATION	DESCRIPTION	PARTICIPANTS
01-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Plastic, E-Waste)	Sector 50, Noida	• Promoted sustainable pads/menstrual cups • Nukkad Natak on grey water, plastic, e-waste	52
01-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Plastic, E-Waste)	Hyde Park, Sector 78, Noida	• Explained dangers of plastic sanitary products • Demonstration on e-waste disposal	53
02-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Adarsh Vihar, Greater Noida	• Menstrual cups vs. plastic pads • Dry & wet waste segregation skit	66
02-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Beta 1 Affordable Housing, Greater Noida	• Highlighted need for jute bags • Encouraged proper e-waste disposal	55
02-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Gaur Saundaryam, Greater Noida	• Environmentally-friendly sanitary solutions • Source segregation demonstration	52
02-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Stellar One, Greater Noida	• Addressed wet/dry separation • Called for e-waste to certified handlers	36

04-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Delta 1, Greater Noida	• Promoted alternatives to plastic pads • Nukkad Natak focusing on garbage disposal	72
05-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Sigma 1, Greater Noida	• Stressed eco-friendly sanitary options • Encouraged jute over plastic bags	55
06-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Omicron 1, Greater Noida	• Large crowd introduced to reusable pads • Marked International Women's Day themes	160
07-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Sector 37, Greater Noida	• Demonstrated segregation steps • Honored women's role in sustainable living	65
08-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Sigma 3, Greater Noida	• Emphasized 10-year usage of menstrual cups • Encouraged responsibly discarding e-waste	75
09-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Sector 2B, Greater Noida	• Discussed grey water and plastic hazards • Safe e-waste disposal message	52
09-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Omicron 3, Greater Noida	• Encouraged cloth or biodegradable pads • Stressed community leadership for cleanliness	72

09-Mar-25	Awareness Session on Waste Management (Menstrual Waste, Street Play)	Swarnim Nagri Affordable House, Greater Noida	• Urged reducing reliance on plastic sanitary products • Celebrated International Women's Day message	73
25-Mar-25	Awareness Session on Waste Management	Sec. 47 Jalvayu Vihar, Noida	• Session on responsible waste management practices. • Focus on community participation and sustainable practices.	50
25-Mar-25	Awareness Session on Waste Management	Sec. 135 Gokuldham, Noida	• Session focused on waste segregation and recycling. • Encouraged residents towards adopting eco-friendly waste management methods • Encouraged residents towards adopting eco-friendly waste management methods.	54

10. LIST OF SOCIETIES COVERED

S. No.	Society / Sector Name	City
1	Sector 118 RWA	Noida
2	Sector 48 RWA	Noida
3	Garima Vihar (Sector 35)	Noida
4	Madhuban Apartments (Sector 82)	Noida
5	Swarnim Vihar (Sector 82)	Noida
6	Gokuldham Apartments (Sector 135)	Noida
7	Sector 12V RWA	Noida
8	Jagriti Apartment (Sector 71)	Noida
9	Rajat Vihar (Sector 62)	Noida

10	Sri Sai Apartments (Sector 71)	Noida
11	Flex Apartments (Sector 62)	Noida
12	The Villas (Sector 100)	Noida
13	6th Avenue (Sector 4)	Greater Noida
14	Sector 112 RWA	Noida
15	Sai Apartments (Sector 71)	Noida
16	Tech Zone 4, Centurion Park	Greater Noida
17	Super Tech Eco Village III	Greater Noida
18	Panchsheel Green 1 (Sector 16B)	Noida
19	Shri Ram Apartments (Sector 118)	Noida
20	Hyde Park (Sector 78)	Noida
21	Jalvayu Tower (Sector 47)	Noida
22	Beta 1 Affordable Housing	Greater Noida
23	Gaur Saundaryam	Greater Noida

25	Delta 1	Greater Noida
26	Sigma 1	Greater Noida
27	Omicron 1	Greater Noida
28	Sector 37 RWA	Greater Noida
29	Sigma 3	Greater Noida
30	Sector 2B RWA	Greater Noida
31	Omicron 3	Greater Noida
32	Swarnim Nagri Affordable House	Greater Noida
33	Century Apartments (Sector 100)	Noida
34	Express View Apartment (Sector 105)	Noida
35	Adarsh Vihar	Greater Noida

11. MONITORING FRAMEWORK

Below is the updated table showing the project's key impact, outcomes, and outputs through March 2025.

Impact	Outcomes	Outputs	Performance Indicators	Nov-24	Dec-24	Jan-25	Feb-25	Mar-25
Community	Community is		No. of stakeholders	839	1111	1133	852	2064

practicing sustainable waste management practices	sensitized on best SWM practices	Stakeholders are sensitized	rs sensitized					
			No. of events conducted	16	17	17	14	15

Here is the **Cumulative Impact Table** summarizing cumulative numbers in terms of the impact achieved from November 2024 to March 2025:

Impact	Outcomes	Outputs	Performance Indicators	24-Nov	24-Dec	25-Jan	25-Feb	25-Mar
Community practicing sustainable waste management practices	Community is sensitized on best SWM practices	Stakeholders are sensitized	Cumulative No. of stakeholders sensitized	839	1950	3083	3935	5999
			Cumulative No. of events conducted	16	33	50	64	79

12. INNOVATIVE QUOTIENT

INNOVATIVE QUOTIENT

Below are four creative approaches employed during the Transforming Neighbourhoods Project to enhance understanding and practice of sustainable waste management in Noida and Greater Noida. All references are drawn from the attached project reports without adding extra data.

12.1. Virtual Reality (VR) Immersion

Context:

Surveys and early interactions suggested that typical presentations (like posters or talks) often failed to capture residents’ full attention or convey the urgency of responsible waste management.

Approach:

Immersive VR modules were introduced, allowing participants to witness virtual scenarios of plastic contamination, landfill overflow, or hazardous e-waste disposal. This hands-on, simulated environment illustrated the ripple effects of ignoring wet-dry segregation or discarding electronics improperly.

Impact:

Many residents reported an increased willingness to adopt composting, plastic-free products, and correct e-waste disposal methods after viewing the VR content. This interactive learning style helped sustain community interest in subsequent events and workshops.

12.2 Nukkad Natak (Street Plays)**Context:**

Addressing topics like menstrual waste or plastic overuse demanded culturally relatable methods to break stigma and simplify messages for diverse audiences.

Approach:

Street plays were staged across multiple residential clusters, featuring local volunteers and facilitators. They dramatized real-life dilemmas—ranging from single-use plastic reliance to unsafe menstrual waste disposal—presenting vivid narratives of how minor daily habits can either harm or help local ecosystems.

Impact:

Because of their conversational tone and humor, these short plays attracted residents who might otherwise skip formal sessions. Post-performance discussions often prompted on-the-spot pledges (such as using reusable sanitary pads or sorting kitchen scraps for composting). This lively format broadened awareness, transcending literacy barriers and generational differences.

12.3. Ludo-Based Gamification**Context:**

The project team observed that while residents generally understood the basics of waste segregation, they often struggled with consistent day-to-day application—especially when handling horticulture residue or e-waste.

Approach:

Select events incorporated a life-sized Ludo board adapted to waste themes. Each roll of the dice moved participants to scenarios where they had to apply correct waste disposal actions. Advancing required demonstrating knowledge—e.g., differentiating plastic from organic waste—while mistakes (like mixing wet and dry) resulted in “penalties.”

Impact:

Families, particularly children, found the game fun and memorable, reinforcing accurate segregation steps in a hands-on, low-pressure context. Observers noted stronger retention of rules, as participants associated each move with a real-life disposal habit.

12.4. Bio-Enzyme Workshops**Context:**

Many residents expressed interest in managing kitchen and horticulture waste yet found traditional composting or upcycling methods too technical or time-consuming.

Approach:

Workshops on bio-enzyme preparation were organized, demonstrating simple ways to convert fruit peels and other organic matter into natural cleaning solutions. Facilitators guided participants through each step—collecting peels, adding jaggery or brown sugar, and letting the mixture ferment.

Impact:

This hands-on approach not only showcased practical wet waste reduction but also introduced a cost-effective, eco-friendly alternative to chemical cleaners. Residents who tried bio-enzyme techniques at home provided positive feedback about reduced waste volume and improved household sanitation practices.

12.5. Textile Upcycling Sessions**Context:**

Textile disposal emerged as a concern in certain RWAs where residents routinely discarded clothes that could otherwise be repurposed, creating unnecessary bulk in community waste streams.

Approach:

Interactive workshops taught participants how to transform old garments into reusable household items (like bags or cushion covers). Facilitators demonstrated stitching, cutting, and design tips, encouraging participants to share creativity and minimize textile waste.

Impact:

Attendees were surprised at the ease of repurposing outfits; many expressed an intention to continue upcycling at home. This not only cut down on waste volume but also sparked a broader conversation on mindful consumption and donation drives.

By combining **VR immersion, Nukkad Natak, Ludo gamification, bio-enzyme workshops, and textile upcycling sessions**, the project offered varied, relatable experiences for residents, reinforcing the central message: waste management practices are accessible, beneficial, and culturally adaptable.

13. CONCLUSION

Between September 2024 and March 2025, the Transforming Neighbourhoods initiative under My Clean City—implemented in collaboration with Womenite—expanded substantially across Noida and Greater Noida. Early efforts focused on baseline surveys, team mobilization, and forging partnerships with RWAs; these steps led to a multi-faceted engagement strategy, which included immersive VR drives, plogging and clean-up campaigns, as well as specialized workshops on textile, horticulture, biohazard, plastic/e-waste, and greywater themes. Interactive sessions such as seed ball activities, street plays (Nukkad Natak), and greywater demonstrations steadily attracted community support, particularly through the My Clean City Volunteer Club's actions.

By March 2025, the project's monthly monitoring data showed consistent engagement outcomes. The number of **stakeholders sensitized** (as per the final table) grew from **839** in November 2024 to **2,064** in March 2025, while **events conducted** ranged between **14 and 17** per month, culminating in **15** events in March. These figures underscore the solidifying local ownership of responsible waste management practices. The sustained emphasis on raising awareness, building capacities, and strengthening volunteer groups has led to greater acceptance of composting, plastic-free alternatives, and structured disposal routes for e-waste and biohazards. Overall, this approach aligned with the project's goals and strategy—namely, to raise

awareness and cultivate strong volunteer leadership—resulting in a notable rise in community-driven adoption of sustainable waste disposal behaviors.
